

# Manual

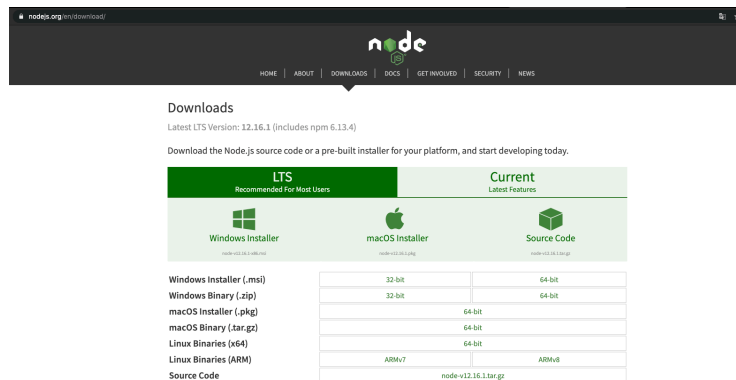

This is Group 2. We designed a website application for the Challenger 4 “Smart Building Data Access Management Scheme”. In order to run the website successfully in your own PC, you need to install the environment for node.js and MySQL.

## 1. Install necessary environment

### 1.1 Download Node.js

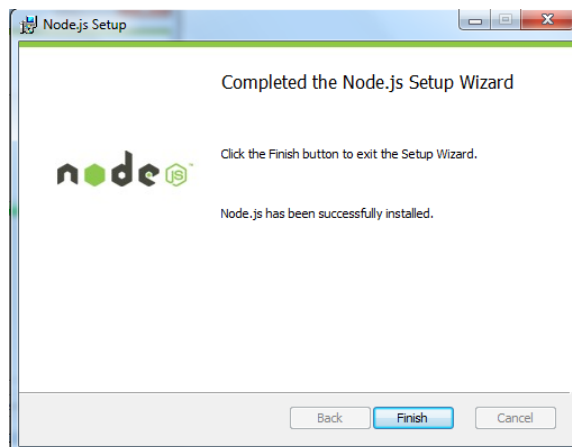

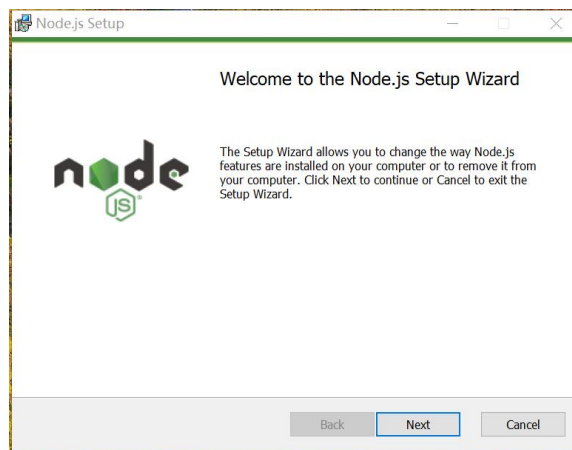

Download address: <https://nodejs.org/en/download/>

Download the installer for your platform:

### 1.2 For WINDOWS

Run the installer, install the node.js environment.

Then check the version of node and npm (Node Version Manager) .

```
E:\>node --version
v0.10.26
E:\>█
```

```
C:\WINDOWS\system32>npm -v
6.13.4
```

Next, use the npm command to install the Node.js web framework module express:

```
<C:\WINDOWS\system32>npm install express -g
<C:\WINDOWS\system32>npm install body-parser --save
<C:\WINDOWS\system32>npm install cookie-parser --save
<C:\WINDOWS\system32>npm install multer --save
<C:\WINDOWS\system32>npm install crypto --save
```

For MacOS

a) Method 1:

Download and run the pkg to install node.js.

b) Method 2:

Open the "Terminal", install node.js and express module.

```
Mac_Chen — -bash — 80x24
Last login: Sat Mar 21 14:21:51 on ttys001
MacBook-Chen:~ Mac_Chen$ brew install node
```

```
Mac_Chen — -bash — 80x24
Last login: Sat Mar 21 14:21:51 on ttys001
MacBook-Chen:~ Mac_Chen$ node --version
v13.8.0
MacBook-Chen:~ Mac_Chen$ npm -v
6.13.7
MacBook-Chen:~ Mac_Chen$ npm install express -g
+ express@4.17.1
added 50 packages from 37 contributors in 1.858s
```

```
$ npm install body-parser --save
$ npm install cookie-parser --save
$ npm install multer --save
$ npm install crypto --save
```

### 1.3 Install MySQL environment

Login MySQL as root: `$ mysql -u root -p`

Import 'usbaccess' database:

```
[mysql> show databases;
+-----+
| Database          |
+-----+
| information_schema |
| mysql              |
| performance_schema |
+-----+
3 rows in set (0.00 sec)

mysql> source ./Desktop/usbaccess.sql;
```

Import successfully!

```
mysql> show databases;
+-----+
| Database |
+-----+
| information_schema |
| mysql |
| performance_schema |
| usbaccess |
+-----+
4 rows in set (0.00 sec)
```

Create users and assign user permissions:

```
mysql> CREATE USER 'acs'@'localhost' IDENTIFIED BY 'mysql';
Query OK, 0 rows affected (0.00 sec)

mysql> GRANT ALL ON usbaccess.* TO 'acs'@'localhost';
Query OK, 0 rows affected (0.00 sec)

mysql> FLUSH PRIVILEGES;
Query OK, 0 rows affected (0.00 sec)
```

Exit:

```
mysql> exit;
Bye
```

Test whether the user was created successfully:

```
MacBook-Chen:~ Mac_Chen$ mysql -u acs -p usbaccess;
Enter password:
Reading table information for completion of table and column names
You can turn off this feature to get a quicker startup with -A

Welcome to the MySQL monitor.  Commands end with ; or \g.
```

## 2. Run the project

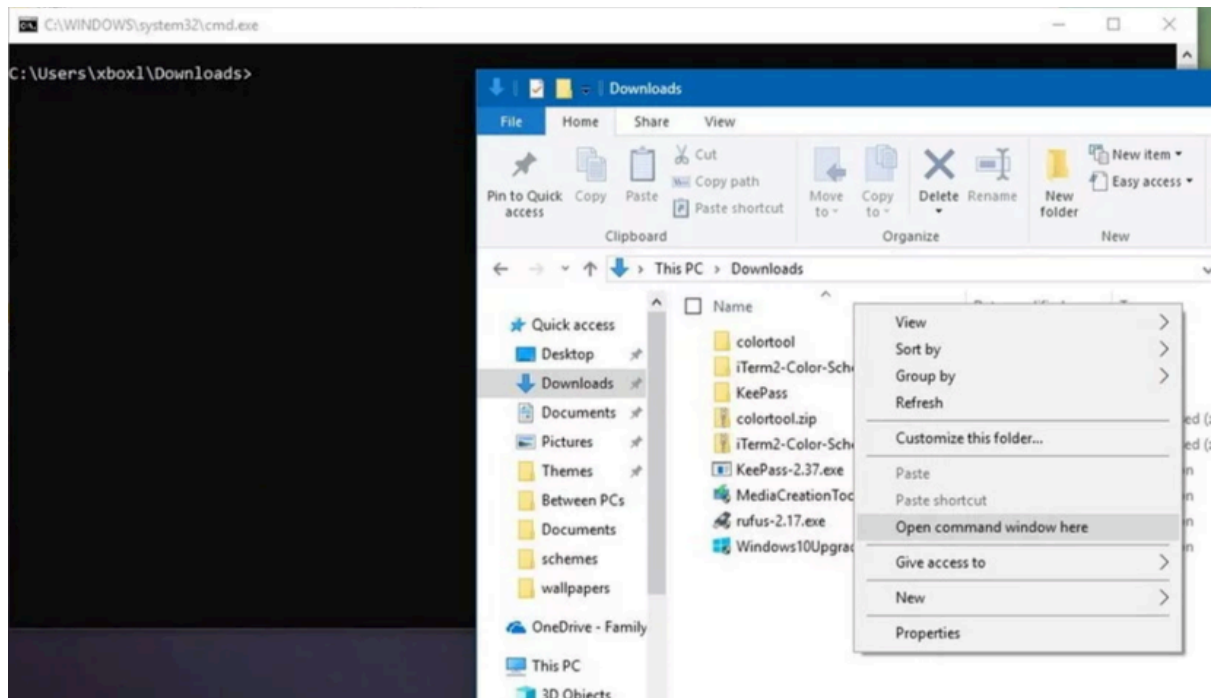

(MacOS) Locate the project file and run the project in the Terminal.

Input like this:

```
$ node (path to the project) /AccessControlSystem/bin/www
```

```
MacBook-Chen:~ Mac_Chen$ node ./Desktop/CSC8208GroupProject/programming/AccessControlSystem/bin/www
GET /login 200 21.949 ms - 1769
GET /stylesheets/login.css 304 4.699 ms - -
GET /images/login/background.jpg 304 2.081 ms - -
GET /images/login/loginTable.png 304 3.250 ms - -
GET /images/login/loginIn.png 304 3.957 ms - -
```

(Windows) Locate the project file and go to the required folder. Then press **Shift + right click** mouse button anywhere on the folder window. Select "Open command windows here" option from the context menu.

Then input like this:

```
> node GroupProject\AccessControlSystem\bin\www
```

### 3. Test

Open the web browser, and then input the URL:

<http://localhost:3000/login>

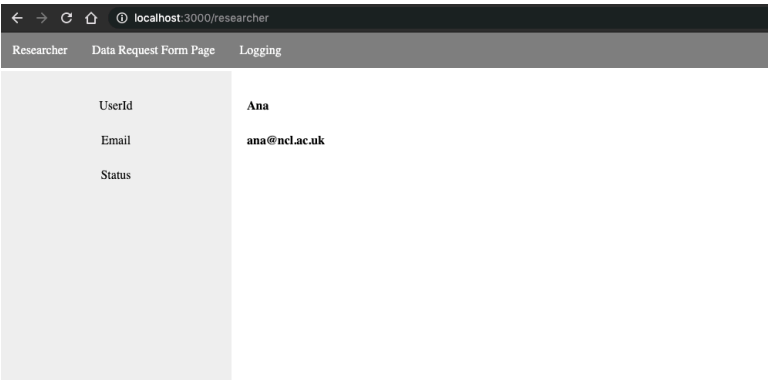

#### 3.1 Login

user_id	password	dashboard		
Amy	123456	researcher	staff	school
Ana	123456	researcher	other	company
Ban	abc	occupant		
Bob	abc	occupant		
Cindy	code	both	student	university
David	code123	both	staff	university

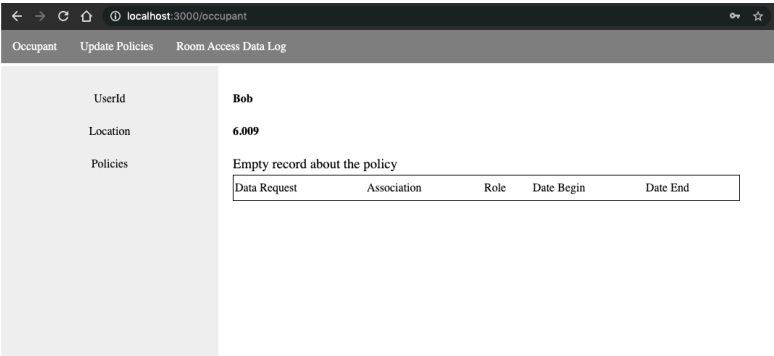

We have created these users previously. Only when the input "user\_id" and "password" matches, you will be able to log in. Empty and input error will login failed.

#### 3.2 Dashboard

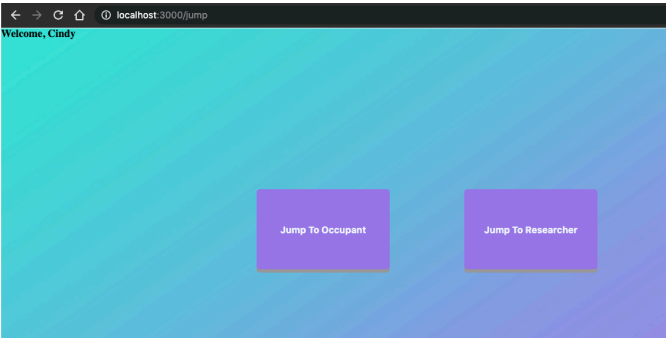

If you log in as a researcher (Amy/Ana), you will directly jump to page “/researcher”.

If you log in as an occupant (Ban, Bob), you will jump to page “/occupant”. (Initially, the database about the policies is empty, so the table about policy is empty. If this user has created some policies, they will be displayed in this table.)

If you log in as researcher and occupant (Cindy, David), you will jump to page “/jump” and be able to make selection by yourself.

### 3.3 Occupant

Click the label "Occupant", you will refresh and jump back to the page "/occupant".

Click the label "Update Policies", you will jump to "/UpDatePolicy". In this page, you will be able to set policies for the office "6.024"(The location is the user's office and can't be modified.)

Occupant Update Policies Logout

Data location: 6.024

Data available: ☐ CO2 ☐ Occupancy Sensor ☐ Relative Humidity ☐ Room Brightness ☐ Room Temperature

Permitted associations: School

Permitted roles: Staff

Date availability: yyyy/mm/dd \* - yyyy/mm/dd \*

Update

Then you can select the types of data, permitted associations, roles and available date and click the "Update" to submit the policy.

Occupant Update Policies

Data location: 6.024

Data available: ☒ CO2 ☐ Occupancy Sensor ☒ Relative Humidity ☒ Room Brightness ☐ Room Temperature

Permitted associations: University

Permitted roles: Student

Date availability: 2020/03/01 ✓ - 2020/03/21 ✓

Update

What you set will be displayed in the table.

UserId	Cindy				
Location	6.024				
Policies	Data Request	Association	Role	Date Begin	Date End
	co2	university	student	2020-03-01	2020-03-21
	relative-humidity	university	student	2020-03-01	2020-03-21
	room-brightness	university	student	2020-03-01	2020-03-21

Sure, you can set separate policies for each type of data one by one or modify several together at the same time. The last policies will overwrite the older policies.

UserId

Cindy

Location

6.024

Policies

Data Request	Association	Role	Date Begin	Date End
co2	university	student	2020-03-01	2020-03-21
relative-humidity	school	staff	2020-02-01	2020-02-08
room-brightness	school	staff	2020-03-01	2020-03-21

The policies are set up for the data location and the types. The association/role/date are the judgement of access control.

Click the label “Room Access Data Log”, the page “/RoomAccessDataLog” will display the past access records(accepted/denied) according to the location.

Location	UserId	UserName	Email	Role	Data Request	Association	Date Begin	Date End	Reason	State
----------	--------	----------	-------	------	--------------	-------------	------------	----------	--------	-------

### 3.4 Researcher

Click the label "Researcher", you will refresh and jump back to the page "/researcher".

Click the label "Data Request Form Page", you will jump to "/DataRequestForm". In this page, it will automatically display the user's information (UserId, role, name, email address, association).

These information can not be modified.

The screenshot shows a web interface for a researcher's data request form. At the top, there is a navigation bar with "Researcher" and "Data Request Form Page" links, and a "Logout" button on the right. The main content area is divided into two columns. The left column lists user information fields: UserId, Role, First Name, Last Name, Email, and Association. The right column contains input fields for these same fields, with the following values: Amy, staff, Amy, James, amy@ncl.ac.uk, and school. Below these fields, there is a section for "Data required" with the instruction "Please select the data that you need:" and five checkboxes: CO2, Occupancy Sensor, Relative Humidity, Room Brightness, and Room Temperature. The "Data location" field is a dropdown menu showing "6.008". The "Date" field consists of two date pickers separated by a range selector "x - x". The "Reason" field is a text area with the placeholder "Write something..".

Field	Value
UserId	Amy
Role	staff
First Name	Amy
Last Name	James
Email	amy@ncl.ac.uk
Association	school
Data required	<input type="checkbox"/> CO2 <input type="checkbox"/> Occupancy Sensor <input type="checkbox"/> Relative Humidity <input type="checkbox"/> Room Brightness <input type="checkbox"/> Room Temperature
Data location	6.008
Date	yyyy/mm/dd * - yyyy/mm/dd *
Reason	Write something..

You can select the data which you need (single or several) and choose the office location, the date you want to apply. Next, click the "Submit" button to submit the request.

Researcher	Data Request Form Page	Logout
Email	amy@ncl.ac.uk	
Association	school	
Data required	Please select the data that you need: <input type="checkbox"/> CO2 <input checked="" type="checkbox"/> Occupancy Sensor <input checked="" type="checkbox"/> Relative Humidity <input checked="" type="checkbox"/> Room Brightness <input type="checkbox"/> Room Temperature	
Data location	6.008	
Date	2020 / 03 / 01 ✓ - 2020 / 03 / 07 ✓	
Reason	test1: I have't set up the policies for room 6.008    	
<input type="button" value="Submit"/>		

Because we have not set the policy for room 6.008.  
 The request will be denied, and you will jump back to page “/researcher”.

Researcher	Data Request Form Page	Logging	Logout
UserId	Amy		
Email	amy@ncl.ac.uk		
Status	No policies for these data. Your requests are denied.		

Here, we test to submit the request about room 6.024 which we have set policy in advanced.

Researcher	Data Request Form Page	Logout
Email	amy@ncl.ac.uk	
Association	school	
Data required	Please select the data that you need: <input checked="" type="checkbox"/> CO2 <input type="checkbox"/> Occupancy Sensor <input checked="" type="checkbox"/> Relative Humidity <input checked="" type="checkbox"/> Room Brightness <input type="checkbox"/> Room Temperature	
Data location	6.024	
Date	2020 / 01 / 01 ✓ - 2020 / 01 / 02 ✓	
Reason	test2: the date in request is beyond the available time in policy.    	
<input type="button" value="Submit"/>		

The required date in the request is beyond the limit of policy so the request is denied, too.

Researcher	Data Request Form Page	Logging	Logout
UserId	Amy		
Email	amy@ncl.ac.uk		
Status	Requests Denied		

According to policy about room 6.024, the request about room-brightness will be accepted.

Researcher	Data Request Form Page	Logout
Email	amy@ncl.ac.uk	
Association	school	
Data required	Please select the data that you need: <input type="checkbox"/> CO2 <input type="checkbox"/> Occupancy Sensor <input checked="" type="checkbox"/> Relative Humidity <input checked="" type="checkbox"/> Room Brightness <input type="checkbox"/> Room Temperature	
Data location	6.024	
Date	2020 / 03 / 01 ✓ - 2020 / 03 / 14 ✓	
Reason	<div>Test3: The policy about room 6.024 relative-humidity school staff 2020-02-01 2020-02-08 room-brightness school staff 2020-03-01 2020-03-21</div>	
<div>Submit</div>		

Occupants set up the policies for the data location and the types. And the judgement of access control will be depended on the researcher's association, role and request date.

As long as one of the requests is approved, it will jump to the new interface "/download". In this page, you will know which requests are accepted and which requests are denied.

Click the label “Logging”, this page will present the historical records of this user’s requests.
